What is this product?

TYPE OF PRODUCT

The product is a sub-fund of Arcipelagos SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The investment objective of the Fund is to seek capital appreciation over the long term through a flexible, active and opportunistic allocation of assets. In order to achieve its investment objective of capital appreciation, the long-term average weighting associated with riskier assets, equities in particular, will outweigh the one associated with safer assets. But depending on market conditions and opportunities, it does not preclude the discretionary flexibility of the Fund to alternatively adopt an offensive or defensive investment strategy by overweighting riskier or safer assets respectively, without any limitation.

The Fund invest mainly in Undertakings for Collective Investments in Transferable Securities ("UCITS") or other Undertakings for Collective Investments ("UCIs") investing, without any limitation, in different asset classes, i.e. in equities, bonds, currencies, money market instruments or other transferable securities in compliance with Article 41 (1) of the Law of 17 December 2010. The Remaining Assets may be invested in Ancillary Liquid Assets and in money market instruments.

From time to time, considering market conditions (during periods of economic and financial uncertainty) and on a temporary basis, up to 100% of the Fund's Net Assets may be held in Ancillary Liquid and money market instruments, subject to compliance with the principle of risk diversification.

The Fund's investments are determined on a discretionary basis, using both a technical and a "top-down" analysis of the markets.

The Fund is actively managed without any reference to a benchmark. In that respect, the Fund is not looking to outperform any benchmark over any given period.

Sale of shares in the Fund can be made on a daily basis.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

The Fund does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of your shares. However, the annual general meeting of shareholders may decide to distribute such income.

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example investment		EUR 10 000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 7 100	EUR 5 200
	Average return each year	-29.0%	-12.3%
Unfavourable scenario	What you might get back after costs	EUR 8 020	EUR 8 530
	Average return each year	-19.8%	-3.1%
		This type of scenario occurred for an investment in the product between December 2021 and September 2023.	
Moderate scenario	What you might get back after costs	EUR 9 950	EUR 12 240
	Average return each year	-0.5%	4.1%
		This type of scenario occurred for an investment in the proxy then the product between March 2017 and March 2022.	
Favourable scenario	What you might get back after costs	EUR 12 360	EUR 13 810
	Average return each year	23.6%	6.7%
		This type of scenario occurred for an investment in the proxy then the product between October 2016 and October 2021.	

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Lemanik Asset Management S.A. is unable to pay out?

Lemanik Asset Management S.A. is not making any payment to you in relation to this Fund and you would still be paid in case of a default from Lemanik Asset Management S.A.

The Fund's assets are held with CACEIS Investor Services Bank S.A. and are segregated from the assets of other sub-funds of the Company. The assets of the Fund cannot be used to pay the debts of other sub-funds of the Company.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested

Investment of EUR 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 702	EUR 1 942
Annual cost impact (*)	7.0%	3.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.2% before costs and 4.1% after costs.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

Please refer to the Prospectus for more information on the specific risks relevant to the product not included in the summary risk indicator.

This product does not include any protection from future market performance, so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.
